About

I am a software developer who has 6 years experience about software development, especially in web development. I have created different web applications, using PHP, C# or NodeJS. I am familiar modern web frameworks (back-end or front-end) such as Laravel, Symfony, AngularJS, VueJS or React. I am also familiar unit testing concept and libraries such as PHPUnit, Codeception, Mockery, Mocha or Jasmine. Further I would be careful about SOLID principles and best practices when I develop a web application in order to write readable, maintainable and testable code. In addition, I love to play with Symfony components as a hobby. You may check my GitHub account and review my codes which I've written if you want to learn more information about me.

Work

Polisoft

2015-07-09 –

Software Developer

<http://polisoft.co.uk>

I have been developed a single page web application about insurance industry with using C# and AngularJS. The application have connection with a lot of SOAP web-services in order to operate all system. Also I have been developing a new application which users can design a complex system. The application allows to user to create another web application in constant rules. Users can design tables, wizards or forms. They can set the rules of forms and they can write even formulas like Microsoft Excel. Additionally, users can create Rest APIs in order to system can be used by third by application.

Freelance

2015-01-01 – 2015-06-01

Software Consultant

I helped to create a humanoid robot which is developed by BA Nurettin Gökhan Adar, Sakarya University. We used C++ as a language and Robot Operating System (ROS) in that project. All equations and maths have been designed by Mr. Adar. I have just helped to implementations.

Ahır Inc

2013-02-13 – 2016-07-09

Software Developer

<http://ahir.com.tr>

I have created three single page applications which can run on cloud with using PHP and Angular. I have used CodeIgniter, Laravel and Symfony 2 in back-end frameworks. In one application, jQuery has been used. In other applications, AngularJS has been used as front-end framework.

Birey

2012-05-30 – 2013-02-13

Software Developer

<http://birey.com.tr>

I have developed the web application which is already exists and is about school management system. I was using old school ways because of the project. That's why I quite. Nevertheless I have added new modules on the application.

Volunteer

Mavidurak IO

2014-08-12 –

Founder

<http://mavidurak.github.io/>

Mavidurak IO is a software community which is located in Sakarya, near of the Istanbul. We had set a lot of meetings and training with developers who live in Sakarya.

Education

Sakarya University

2017-07-17 –

Computer And Information Engineering
Master's degree

Sakarya University

2006-09-01 – 2010-06-24

Computer And Electronics
Bachelor's degree

A.N. Bilimli Technical High School

2002-09-15 – 2006-05-24

Software Development
Technical High School

Publications

Package Development With PHP (Turkish)

2015-01-26

Published by Özgür Adem Işıkılı

The book is about how can you develop and test a package which is readable, maintainable in PHP.

Skills

Languages

- NodeJS
- C#
- Javascript
- PHP

Back-End Frameworks

- Laravel
- CodeIgniter
- Symfony2
- ExpressJS
- .Net MVC

Front-End Frameworks & Libraries

- AngularJS
- VueJS
- React

Testing Libraries

- PHPUnit
- Mockery
- PHPUnitex
- Codeception
- Jasmine
- Mocha
- NUnit

Databases

- MySQL
- MSSQL
- Oracle
- MongoDB

Others

- Git
- Linux Systems
- Memcache
- Ruby
- RabbitMQ
- ROS

Languages

Turkish
Native speaker

English
Upper intermediate (B2)
